

Cumulative Index 1991

Volume 18

<i>January</i>	AESTHETIC SURGERY OF THE FACIAL SKELETON , pages 1-215
<i>April</i>	APERT SYNDROME , pages 217-435
<i>July</i>	RECONSTRUCTION OF THE LOWER EXTREMITY , pages 437-652
<i>October</i>	MALE AESTHETIC SURGERY , pages 653-900

Note: Page numbers for complete issues and articles are in **boldface** type.

- Abdomen, reduction of, 800-803
 Abdominoplasty, in men, 804-807
 Achilles tendon, defects of, reconstruction in, 628-629, 631
 Acne, in Apert syndrome, 223, 305, 329, 407
 Acrocephalosyndactyly, type I. *See* **Apert syndrome**.
 Aesthetic surgery, in male, **653-889**
 of facial skeleton, **1-212**
 of forehead, **19-27**
 Airway, narrowing of, in Apert syndrome, 220, 227-228, 303, 309
 neonatal, obstruction of, in Apert syndrome, 309-310
 Allergic reactions, to anesthesia, 887
 Alloplastic prostheses, for calf augmentation, 601-602, 605
 Amputations, lower extremity, 535-537
 Anesthesia, and cardiac arrhythmias, 873
 for body contouring, 798
 for male aesthetic surgery, **863-875**
 drug management prior to, 865
 emergency equipment for, 867
 evaluation prior to, 863-865
 facility design and set-up for, 866-867
 patient questionnaire in, 864
 premedication and, 865-866
 preoperative testing in, 866
 problems associated with, management of, 869-874
 recovery and discharge following, 868-869, 873
 techniques of, 867-868
 for microsurgery of lower extremity, 487
 for periorbital aesthetic surgery for men, 699
 general, for aesthetic surgery in men, 867-868
 local, for male aesthetic surgery, 868
 for physician-administered anesthesia in office, 881-882
 physician-administered in office, **877-889**
 and postoperative analgesia, 884
 certification and, 877
 drugs used in, 877
 local anesthesia, 881-882
 maintenance during procedure, 882-883
 perioperative monitoring for, 879-880
 perioperative problems in management of, 885-886
 preoperative preparations for, 878-879
 recovery following, 883-884
 sedation for, 880-881
 selection of patients for, 877
 staff for, 877-878
 Ankle, in Apert syndrome, 399, 400
 Antibiotics, delivery systems for, in osteomyelitis of lower extremity, 519-520
 in treatment of osteomyelitis of lower extremity, 520
 used in Apert syndrome, 305, 407
 Apert syndrome, **217-427**
 acne in, 223, 305, 329, 407
 adult with, 223
 anesthetic management in, **227-230**
 behavioral problems in, 414
 clinical anatomy and evaluation in, 291
 clinical assessment and multispecialty management of, **217-225**
 clinical variations in, 217-218
 craniofacial anatomy of, **237-249**
 awareness of peers of, 413
 craniofacial dysmorphology in, 322
 craniofacial approach in, 270-272
 cranium in, 254-258
 general concepts of, 252-253
 goals of, 279
 management of, history of, 251
 midface in, 262-270, 281-284, 297-301
 nose in, 262-263
 orbits in, 258-262
 patient data on, 252, 253
 surgical correction of, **251-275, 277-289**
 bone advance/cranioplasty in, 279-281
 maxillary/mandibular osteotomies in, 284-288
 craniofacial surgery in, and airway, 311
 cranioostenosis and intracranial anomalies in, diagnosis and treatment of, **231-235**
 cranium in, 241-244, 254-258
 developmental and psychologic considerations in, **409-416**
 developmental progress in, 221, 233-234
 elbow in, 322-325, 326, **381-389**
 foot in. *See* **Foot(Feet)**, in **Apert syndrome**.
 forearm in, 337-338, **381-389**

- Apert syndrome (*Continued*)
- functional activities in, 381-382
 - genetics and, 219
 - hand in. See *Hand(s)*, in *Apert syndrome*.
 - hearing and otitis media in, 221-223, 311-312
 - management of, 312-313
 - hospitalization of children with, 413, 414, 415
 - hydrocephalus in, 221, 232-233
 - incidence of, 217-218, 321
 - initial assessment and management in, 219-221
 - intellectual potential in, 410-411
 - leg and foot in, anatomy and management of, 399-405
 - limb abnormalities in, classification and pathologic anatomy of, 321-355
 - lips in, 294-295
 - long-term management in, 221-223
 - mandible in, 248, 270, 284-288, 292-293, 302-303
 - maxilla in, treatment of, 301-302
 - midface in, 245-248, 262-270, 281-284, 291-292, 297-301
 - narrowing of airway in, 220, 227-228, 303, 309
 - neck in, 295
 - ocular aspects of, 315-319
 - ocular surgery in, complications of, 318-319
 - operative treatment of, 234-235
 - ophthalmologic problems in, 223
 - orbits in, 244-245, 258-262
 - orthodontic and oral/maxillofacial evaluation and treatment in, 291-307
 - otolaryngologic aspects of, 309-313
 - parental adjustment to, 409
 - preoperative evaluation in, 228
 - psychosocial development in, during school-age period, 413-414
 - for toddler and preschooler, 412-413
 - in adolescence, 414-415
 - in infancy, 411-412
 - radiographs in, 295-297
 - responsibilities of caregivers in, 221, 222
 - shoulder in, 322, 323, 324, 381-389
 - skeletal abnormalities in, 337-349
 - sleep apnea in, 223, 227, 303, 310-311
 - treatment of, 311
 - subsurface dysmorphology in, 241
 - surface dysmorphology in, 237-240, 241
 - surgical treatment and orthodontics in, coordination of, 297-301
 - teeth in, 247, 268, 269, 292, 293-294, 302
 - thumb in. See *Thumb*, in *Apert syndrome*.
 - visual status assessment in, 232
- Arrhythmias, cardiac, anesthesia and, 873
- Arteriography, of lower extremity, 486
- treatment of, 775-790
 - postoperative temporal, 787, 790
 - prevention of, ancillary procedures for, 781-783
 - reductions in. See *Reductions*, in *baldness*.
 - scalp "lift" and, 779-780
 - vertical flaps in treatment of, 777, 778
- Behavioral problems, in Apert syndrome, 414
- Bimaxillary protrusion, 163, 164
- and nasal augmentation, 163-165
 - segmental osteotomy and, 165, 166
 - results of, 165, 167, 168
- Blepharoplasty, lower lid, 713-717
- male, anesthesia and, 699
 - creative, 703-704
 - for improved upper lid region, 705-709, 710, 711
 - recurring problems in, 702-703
 - upper lid, 709-713
- Blepharoplasty approach, for alloplastic cheek augmentation, 37
- subciliary, for male facial contour alteration, 739
- Blindness, in Apert syndrome, 223, 259-262, 315, 316
- Blood pressure, changes in, anesthesia and, 869-873
- Blood supply, of knee, 556
- of lower extremity, 553-557
 - of lower leg, 556
 - to fasciocutaneous flaps, 571-574
 - to inguinal region, 553, 554
 - to thigh, 553-554, 555, 556
- Blood vessels, cutaneous, pathways to skin, 559, 560
- disease of, in diabetes mellitus, 467-468
 - disorders of, microsurgery of lower extremity and, 486
 - evaluation of, prior to foot reconstruction in diabetes mellitus, 470-471
 - injuries of, in lower extremity injuries, 529-532
 - of hand, in Apert syndrome, 332, 333-334
 - perfusing skin, three-dimensional network of, 565, 566
 - peripheral, insufficiency of, and diabetes mellitus, reconstruction of foot in, 467-483
 - recipient, for immediate reconstruction of lower extremity, 453-454
- Body contouring, for particular anatomic sites, 799-813
- gender differences and, 798
 - general guidelines for, 798-799
 - male, 797-813
 - goals of, 797-798
 - indications for, 797
 - patient selection for, 797-798
 - operating room preparation for, 798-799
 - patient positioning for, 798
 - postoperative care in, 799
- Body image, interface surgery of face and, 16-17
- Bone gaps, bridging of, Ilizarov concept of, 499-500
- methods of, 497-499
 - with Ilizarov technique, 497-504
 - complications of, 501-502
- Bone grafts, in injuries of lower extremity, 528-529
- in mandibular augmentation, 159-161
 - Kiel, 88
 - shrinkage of, following facial rejuvenation, 199
- Bone mass, changes in, in aging, 197, 200, 201
- Bone(s), and soft-tissue envelope, of face, interaction of, 5, 6
- augmentation of, in aging face, 197
 - structure of, and skin sag, 200, 201, 202
- Bronchospasm, in reaction to anesthesia, 887-888
- Bunionette, 641
- Buttock implantation, implants for, 848-851
- incisions for, 848, 850
 - postoperative care in, 851

- problems associated with, 848, 851
technique of, 851
- Buttocks, contouring of, 811, 812, 813
- Calf, aesthetics, Golden Ratio of, 603, 604
augmentation of, aesthetic considerations for, 602-603, 604
alloplastic materials for, 601-602, 605
and correction of contour deformities, 601-613
cases illustrating, 608, 609, 610, 611
complications of, 609, 612
technique of, 603-609
- Calf augmentation, 857-862
ambulation following, 830
anatomic assessment for, 857, 861
anesthesia for, 831-832
compartment syndrome following, 836
complications of, 862
implants for, 832, 858, 862
incisions for, 830, 832, 858, 862
indications for, 829, 857
instruments used in, 832, 859, 860
limitations of, 830
postoperative care in, 833-836
postoperative medication and, 831
preoperative evaluation and marking for, 830, 831
preoperative planning for, 830-831
results of, 834, 835, 861
stacking implant system for, 836, 837-838
surgical procedure for, 831-833
techniques for, 829
- Callosities, in bone gaps, 499
- Canthopexy, and lid crowding, 721, 722
for facial rejuvenation, 198
Type I, variation of, 719, 720
with disinsertion of lateral canthal tendons, 718-719, 720
Type II, 719-721
via coronal incisions, 721-723
with transposed flaps, 724, 727, 728, 729
- Canthus, lateral, anatomy of, 187
medial, 187
- Cardiac arrhythmias, anesthesia and, 873
- Carpus, in Apert syndrome, 337-338
- Cartilage grafts, combined with fascia graft, for
augmentation of nose, 70
harvesting of, for nasal and paranasal augmentation, 65
removal of, for nasal and paranasal augmentation, 65
- Central nervous system, malformation of, in Apert syndrome, 220
- Cheek augmentation, alloplastic, 29-38
blepharoplasty approach for, 37
candidates for, 32-34, 35
complications of, 38
examination for malar deficiency in, 31-32
face lift approach for, 37
facial analysis for, 29-31
intraoral approach for, 36-37
technique for, 36-37
types of implants for, 34-36
free grafts for, 39-40, 41, 42, 43, 44-45, 46, 47-48, 49
pedicled flaps for, 40
temporalis muscle in, 40-45, 50, 51, 52
using autogenous materials, 39-53
complication of, 39, 40
- Cheeks, deficiency of, examination for, for cheek augmentation, 31-32
prominence of, and facial analysis, 29-31
- Chest, augmentation, in men, 800, 801-802
male, correction of, 823-828
implantation in. *See Pectoralis implantation.*
wall, deformities of, pectoralis implantation in, 842, 846, 847
- Chin, augmentation of. *See Cleft augmentation mentoplasty.*
dimple, 852
misshapen in horizontal and vertical dimensions, 150-151
misshapen in horizontal dimension, 149-150
misshapen in vertical dimension, 150
sagittal and vertical dimensions of, increasing of, 143, 145
shortening of, 146
sagittal dimension of, increasing of, 141-143, 144
reduction of, 143-146
vertical dimension of, increasing of, 143, 145, 146
reduction of, 146, 147
- Chin deformity, bony, algorithmic approach in, 141-151
clinical evaluation in, 139-141
lower face analysis in, 141
surgical system for correction of, 139-152
without occlusal problems, 142
- Claw toe, 641-642
- Cleft augmentation mentoplasty, 851-855
postoperative care in, 855
procedure for, 852-855
results of, 853, 854
- Clinodactyly, 365
- Compartment syndrome, in lower extremity replantation, 446
- Computed tomography, in Apert syndrome, 295-297
- Craniofacial dysmorphism, in Apert syndrome, 237-249
surgical correction of, 251-275, 277-289
- Craniosynostosis, in Apert syndrome, diagnosis and treatment of, 231-235
- Cranium, in Apert syndrome, 241-244
surgical correction of, 254-258
- Crouzon syndrome, intervertebral fusion in, 295
- Crown, height of, baldness and, 775
- Cutaneous flaps. *See Fasciocutaneous flaps, and cutaneous flaps.*
- D'Assumpcao marker, for foreheadplasty, 675, 676
- Dental hygiene, in Apert syndrome, 302
- Developmental considerations, in Apert syndrome, 409-416
- Diabetes mellitus, foot reconstruction in. *See Foot(Feet), reconstruction of, in diabetes mellitus.*
hemorrhologic changes in, 468-469
vascular disease in, 467-468
- Diaphysis, longitudinally bracketed, 365
- Ectropion, 189-191
- Elbow, in Apert syndrome, 322-325, 326, 381-389
- Emergency free-tissue transfer, definition of, 449
history of, 449-450
in reconstruction of lower extremity, 453
monitoring of, in lower extremity reconstruction, 455
wound healing in, 450
- Emotional response, to facial contour, 698
- Entropion, 188-189
- Epicanthal folds, medial, in men, 713, 714

- Epinephrine, and physician-administered office anesthesia, 882
 excess, symptoms of, 886-887
- Exorbitism, in Apert syndrome, 232, 245, 315, 316
- Extremity(ies), lower. See *Lower extremity*.
- Eye(s), infraorbital rim of, deficiencies of, hemioxophthalmos and, 723, 724
 problems of, in Apert syndrome, 223
- Eyebrow, elevation of, in foreheadplasty, 656-661, 671, 674
- Eyelid(s), anatomy of, influence of, on palpebral apertures, 183-195
 specific, 185-186
 atonicity of, management of, 717-718
 crowding of, canthopexy and, 721, 722
 in Apert syndrome, 315
 lower, and orbit, 713-717
 malpositions of, 188-191
 of Oriental female patients, 183, 184
 topographical, anatomy of, 183, 184
 upper, bony encroachment and protruding orbital rim of, 711-713
 improved, male blepharoplasty for, 705-709, 710, 711
 lid retraction of, 186, 193
 malpositions of, 191-193
 normal anatomy of, 192
 skin excision on, designs for, 709-711
- Face. See also specific parts of face.
 aesthetic appearance of, planning for, 87-88
 bony foundation of, and soft-tissue envelope of, interaction of, 5, 6
 contour of, approaches for augmentation of, 89
 emotional impact of, 698
 male, alteration of, by alloplastic implantation, 731-732
 evaluation of patient for, 732
 intraoral route for, 738-739
 malar-midface augmentation for, 738
 premandible approach for, 740-741
 preoperative planning for, 737
 rhytidectomy approach for, 739-740
 subciliary blepharoplasty approach for, 739
 technique for, 737-738
 temporal-zygomatic and coronal approach for, 740
 materials for augmentation of, 88
 interface surgery of, ambivalence as motivational state for, 14
 body image and, 16-17
 body-dysmorphic patients requesting, 12
 compulsive cosmetic surgery patients requesting, 12-13
 considerations specific to, 17-18
 emotional responses to, preoperative discussion of, 17
 internally directed motivations for, 14
 motivation(s) for, 13-15
 age influencing, 14
 personality features of population requesting, 11
 psychiatric disorders in population requesting, 11-12
 psychosocial considerations in, 11-18
 psychosocial outcome of, 15-16
 to please another, 13-14
 to provide solution to life problem, 13
 lower, description of, 4-5
 total bony rejuvenation of, 171-181
 materials for, 171-172
 technique of, 172-177, 178, 179, 180, 181
 malar midface region of, 3-4
 male, aging, 653
 facial expressions and, 653-654
 augmentation of, concepts of zonal anatomy in, 733-736
 normal, 1-2, 3
 orbital region of, 2-3, 4
 reduction of, contouring in, 799-800
 rejuvenation of, skeletal alterations for, 197-203
 patient selection for, 198
 results of, 199
 surgical considerations in, 197-199
 supranormal or attractive, 6
 temporal region of, 2, 3
 Face lift, subperiosteal, 22-27
 Face lift approach, for alloplastic cheek augmentation, 37
 Facial aesthetics, basic principles of, 732
 Facial analysis, and malar prominence, 29-31
 Facial augmentation, contouring in, 799
 Facial balance, basic principles of, 732-733
 Facial form, method of analysis of, 6-7
 cases illustrating, 7-9
 data sheet for, 7
 Facial skeleton, aesthetic surgery of, 1-212
 aesthetics, evaluation of, and surgical planning, 1-9
 alterations in, for facial rejuvenation, 197-203
 patient selection for, 198
 results of, 199
 surgical considerations in, 197-199
 imbalances of, requiring osteotomies, 206-211
 Fascial grafts, free, combined with cartilage graft, for nasal augmentation, 70
 removal of, for nasal and paranasal augmentation, 65
 harvesting of, for nasal and paranasal augmentation, 65
 in Skoog's procedure, for nasal augmentation, 70, 72, 73
 isolated free, for nasal augmentation, 75
 temporalis, for augmentation of nasal dorsum, 75-77, 78
 temporalis free, to augment radix of nose, 77-81
 Fascial spreader graft, temporalis, reconstructing of roof of nasal vault with, 81-82, 83, 84-85
 Fasciocutaneous flaps, and cutaneous flaps, 564-567
 clinical application of, 567, 568
 cluster analysis for, 565-567
 blood supply to, 571-574
 choice of, by regions, 575-581
 in reconstruction of lower extremity, 571-582
 aesthetics in, 575
 operative technique for, 574-575
 results of, 581
 indications for, 571
 limitations of, 581
 Feeding, oral, in Apert syndrome, 220-221
 Fixator devices, external. See *Ilizarov devices*.
 Flanks reduction, in men, 807-808, 809
 Flap(s), dissection of, for use in lower extremity, 487
 fasciocutaneous. See *Fasciocutaneous flaps*.
 for resurfacing of sole, 615-616
 free scalp, types of, 791, 792, 793
 free temporoparietal, design of, 792, 794
 microsurgical free temporoparietal, clinical cases illustrating, 793, 796
 dissection of vessels for, 792, 794
 in male pattern baldness, 791-796
 muscle, for coverage in lower extremity, 545-552
 for use in lower extremity in osteomyelitis, 515-516, 518

- of foot, 627-638
 - musculocutaneous. See *Musculocutaneous flaps*.
 - of foot, muscle and musculocutaneous, 627-638
 - preauricular, in early baldness, 783, 784
 - in large area of baldness, 784, 785
 - preparation of recipient site for, for microsurgery to
 - lower extremity, 488
 - retroauricular, in large area of baldness, 784, 785
 - transfer of, in injuries of lower extremity, 527-528
 - vertical, in treatment of baldness, 777, 778
 - scalp lift combined with, 780-781
 - vertical mini, for treatment of baldness, 777
 - Flexor retinaculum, in Apert syndrome, 334, 335
 - Foot(Feet), distal plantar area of, reconstruction of, 628, 633-634
 - in Apert syndrome, 322, 349-355, 391-397, 399, 400, 401, 402, 403
 - deformities of, clinical and radiographic manifestations of, 392-395, 396
 - etiology of, 391
 - management of, 395-396, 401-404
 - muscle and musculocutaneous flaps of, 627-638
 - painful syndromes of, diagnosis and management of, 639-648
 - proximal plantar area of, and heel, reconstruction of, 634-6373-634
 - reconstruction of, in diabetes mellitus, and peripheral vascular insufficiency, 467-483
 - approaches for, 473
 - at foot dorsum, 473-474
 - at hindfoot, 476-481
 - at plantar forefoot, 474, 475, 476, 477
 - at plantar midfoot, 474-476, 477, 478, 479
 - neurological evaluation for, 471
 - planning of, 472-473
 - preoperative evaluation for, 469-471
 - radiology prior to, 469-470
 - vascular evaluation for, 470-471
 - wound management in, 471-472
 - sole of, neuropathy and ulceration of, resurfacing in, 616-617
 - normal, sensibility of, 619
 - reconstruction of, methods of, 615-616
 - soft-tissue stability of, 621-622
 - resurfacing and sensory recovery of, 615-626
 - sensibility of, methods to measure, 617-619
 - sensory recovery and sensibility in flaps in, 620-621, 622
 - stress fractures of, 646-647
 - territories of, reconstruction of, 628-637
- Forearm, in Apert syndrome, 337-338, 381-389
- Forehead, 2
 - aesthetic surgery of, 19-27
 - augmentation of, 20-22, 23
 - orbital rim correction and, 20, 21
 - osteotomies of, 205
 - recontouring of bone of, 20
 - surgical approach to, incisions in, 19-20
- Foreheadplasty, male, 653-687
 - consultation for, 656
 - fundamental concepts of, 653-656
 - incisions for, 656-661, 665-666, 675, 676
 - postoperative care in, 678-679
 - postoperative problems associated with, 679-681
 - preoperative planning for, 656-664, 665

- Spade hand, in Apert syndrome, 325, 327
- Spoon hand, in Apert syndrome, 328
- Strabismus, in Apert syndrome, 317-318
- Stress fractures, of foot, 646-647
- Supraorbit, osteotomies of, 205
- Surgery, aesthetic. *See* *Aesthetic surgery.*
- men during, 698-699
- Syncope, anesthesia and, 869
- Tailor's bunion, 641
- Tarsal bones, coalition of, 645-646
- Tear trough deformity, repair of, 723-724, 725
- Tearing, in Apert syndrome, 315, 318
- Teeth, in Apert syndrome, 247, 268, 269, 292, 293-294
 - exposure of, 302
- Temporal fossa, reduction and augmentation of, 55-64
 - coronal incision for, 56, 57
 - planning of, 55-56
 - results of, 59-63
 - technique for, 56-59, 60
- Temporalis fascia graft, for augmentation of nasal dorsum, 75-77, 78
- Temporalis fascia spreader graft, for restructuring of roof of vault of nose, 81-82, 83, 84-85
- Temporalis free fascia graft, to augment nasal radix, 77-81
- Temporalis muscle, in cheek augmentation, 40-45, 50, 51, 52
- Tendons, of hand, in Apert syndrome, 334-336
 - posterior tibial, dysfunction of, 644-645
- Thigh, blood supply to, 553, 554
 - lateral, reduction of, 808-812
 - medial, reduction of, 809, 810-811
 - muscles of, 554-556
- Thrombosis, as complication in microsurgery of lower extremity, 488-489
- Thumb, in Apert syndrome, anatomy of, 365, 366, 367, 368
 - and management of, 365-380
 - surgical correction of, first web space in, 375-376
 - flap design for, 376
 - lengthening in, 377
 - preoperative planning for, 376
 - realignment and mobilization in, 377
 - secondary procedures for, 377-380
 - timing of, 368, 369
 - surgical procedures on, 366, 369-375
- Thyroid ophthalmopathy, 186, 193
- Tibia, fractures of, classification of, 527
- Toe(s), claw, 641-642
 - hammer, 641-642
 - in Apert syndrome, 392, 393, 394, 401
 - mallet, 641-642
- Trauma, male rhinoplasty following, 752-753, 754-755
- Vascular prosthesis, coverage of, planning of, 585-586, 587, 588
- Vision, assessment of status of, in Apert syndrome, 232
- loss of, in Apert syndrome, 223, 259-262, 315, 316
- Vomiting, following anesthesia, 873-874
 - management of, 885-886

- Wound, assessment of, in injuries of lower extremity, 545-546
- Wound healing, factors influencing, 450-451
- Wound infection, in lower extremity replantation, 446
- Wound management, in reconstruction of foot in diabetes mellitus, 471-472
- prior to microsurgery of lower extremity, 486-487
- Wrist, in Apert syndrome, analysis of pathologic anatomy of, 329-349
- Zygoma, osteotomies of, 205
- Zygomatic arch, reduction and augmentation of, 55-64
- coronal incision for, 56, 57
- planning of, 55-56
- results of, 59-63
- technique for, 56-59, 60
